PROJECTS

Aeris — Travel Companion & Pricing Analytics Engine AI-powered flight companion & travel intelligence dashboard with live tracking and dynamic pricing. - Built dual-mode SVG pricing charts seeded with a character-hashing algorithm for per-route market curves. - Integrated OpenSky live flight tracking and a secured server-side Google Gemini AI concierge agent. - Added Firebase Auth + Firestore real-time sync for bookings, alerts, and multi-terminal sessions. <i>[React 18] · [TypeScript] · [Express.js] · [Gemini API] · [Firebase] · [Vercel]</i>	aeris-travel-dispatch.vercel.app github.com/GoldaPraisyl/Aeris-Travel-Dispatch
Tamil Nadu House Price Predictor & AI Valuation Engine AI property valuation app covering all 38 TN districts with a Random Forest model at 98.1% R^2 . - Trained a RandomForestRegressor pipeline on 1,200 listings; 98.1% R^2 accuracy across districts. - Built a Flask API on Vercel Serverless with on-the-fly model fallback retraining under 0.3s. - Engineered a 3D flip-card 'Valuation Complete' result with price and per-sqft breakdown. <i>[React] · [Flask] · [scikit-learn] · [pandas] · [Vercel Serverless]</i>	house-price-prediction-ai-ten.vercel.app github.com/GoldaPraisyl/House-Price-Prediction-AI
Grab-A-Seat — Restaurant Table Reservation Platform Full-stack restaurant reservation platform with real-time seat availability. - Built responsive booking UI using Supabase and TanStack Query for real-time data and caching. - Implemented type-safe create/view/cancel reservation flows end-to-end. <i>[React 18] · [TypeScript] · [Supabase] · [TanStack Query] · [Vercel]</i>	grab-a-seat-three.vercel.app/login github.com/GoldaPraisyl/Grab-A-Seat

Snake Game – Neo Classic Edition

snake-game-mini-rho.vercel.app
github.com/GoldaPraisyl/Snake-Game-Mini

2D Snake web app with interactive food modes and a dark cyber-neon aesthetic.

- Designed 5 dynamic food modes, incl. a 'Runner' mode that flees when approached.
- Built streak-based scoring, progressive speed scaling, and a persistent top-10 leaderboard.

All-in-One Calculator

all-in-one-calculator-wmjj.vercel.app
github.com/GoldaPraisyl/All-In-One-Calculator

42+ specialized calculators across Math, Finance, Health, Engineering, and more, in a fast SPA.

- Built 42+ modular calculators with a searchable sidebar, using mathjs/nerdamer for solving and chart.js for graphs.
- Fixed Vercel deploy failures: strict TypeScript build errors and a Git LFS misconfiguration serving source as raw pointers.

SarFaGo – Cozy To-Do & Focus App

todo-list-application-ashy.vercel.app
github.com/GoldaPraisyl/ToDo-List-Application

Task manager paired with a Pomodoro-style focus timer and ambient study sounds.

- Built Supabase auth (sign up/log in, session persistence) with a localStorage fallback.
- Engineered a Focus Timer with configurable cycles and 5 Web-Audio-synthesized ambient soundscapes.
- Designed 4 switchable themes with category-based task filtering and quote rotation.

SIM Activation Portal

sim-activation-frontend.onrender.com
github.com/GoldaPraisyl/Sim-Activation-Portal

Telecom-style SIM lifecycle management system with a public self-activation flow and an admin dashboard.

- Built a layered Spring Boot 3 / Java 21 REST API (Controller-Service-Repository) with Spring Data JPA over MySQL for SIM cards, customers, plans, and activations.
- Implemented a public activation endpoint that auto-provisions SIM/customer records by MSISDN, plus an admin flow enforcing SIM-status transitions (Available → Activated → Deactivated).
- Built a React 19 + React Router frontend (Activate, Dashboard, Customers, SIM Cards, Activations) with Axios and a live stats dashboard via a dedicated /api/dashboard/stats endpoint.
- Containerized the backend with Docker for Cloud Run and deployed the frontend separately on Render.

Portfolio Website

goldapraisyl.github.io/Golda-Praisyl-Portfolio
github.com/GoldaPraisyl/Golda-Praisyl-Portfolio

Hand-coded, zero-dependency personal portfolio SPA (no frameworks) with a premium, animated design.

- Built a 9-section SPA in vanilla HTML5/CSS3/JS (ES6+) — glassmorphism cards, dark/light theme tokens, and a 55-particle Canvas API bubble background.
- Implemented a custom dual-element cursor, scroll-triggered reveal animations via IntersectionObserver, and a typing-effect hero tagline cycling 6 roles.
- Built a custom auto-playing certificate slider (32 certificates) with keyboard, swipe, and dot-navigation controls.
